

HSB News Brief

HSB International Inc. is in the advanced stages of dismantling a 400 TPD pulp mill it purchased in the Northeastern United States.

Working closely with a local contractor hired to carry out the removal work, HSB is responsible for the sale, match-marking, dismantling and crating and overall coordination of this multimillion dollar project.

HSB purchased the pulp mill in 2005 and dismantling began in February 2006. The equipment was sold to a leading Indian Pulp & Paper group and will be reconstructed and reassembled in India, with the basic and detailed engineering being carried out there. Major equipment includes the bleach plant, chlorine

dioxide plant, and pulp mill and related equipment. Most of the piping, all valves, instrumentation and equipment are being properly marked in order to ease the engineering and reinstallation process.
